

True DBInput Pro 6.0 streamlines the process of building enterprise-wide database applications. Developers save valuable coding time and end users get the functionality they need and enjoy using.

True DBInput™ Pro 6.0 Data-aware ActiveX Input Controls for Microsoft® Visual Studio®

APEX True DBInput Pro 6.0

True DBInput Pro 6.0 is a collection of eight high quality, data-aware ActiveX input controls and five objects designed for Microsoft Visual Studio database front-end application development. True DBInput Pro 6.0 provides enhanced controls that replace the text, calendar, mask, edit box, and frame controls in VB, and adds objects tailored for financial applications. This expanded functionality provides Visual Studio developers the tools needed to build enterprise-wide database applications more quickly and easily, with less coding.

True DBInput Pro 6.0 includes two new controls (TDBCcalendar and TDBCcontainer3D), five new ActiveX objects, and more than 100 new properties. An external editor interface has also been added to permit many of the True DBInput Pro 6.0 controls to be integrated directly into True DBGrid Pro 6.0.

Powerful and Easy-to-Use Controls

- q **New TDBCcalendar** displays up to 12 months of date information and provides international character support, enhanced calendar displays, and holiday settings.
- q **New TDBCcontainer3D** is a redesigned and optimized 3D effects container for all of the True DBInput controls. Effects can be applied to all or individual child controls within the container.
- q **TDBDate** establishes the beginning of a fiscal year, fiscal quarter, first month of the fiscal year, and more.
- q **TDBMask** defines data entry masks for standard or custom formats, character filtering, reference table creation, and data validation.
- q **TDBNumber and TDBNumLite** offer choices for positive and negative number display and manipulation, color association with data values, range checking, and much more.
- q **TDBText** permits entry of large amounts of text into a memo or comments field.
- q **TDBTime** provides facilities to manipulate hours, minutes, and seconds.

New ActiveX Objects for Financial Apps

- q **TDBDateX** provides detailed date and time information, and can be used as an external object for TDBDate and TDBTime controls.
- q **TDBDTCalcX** calculates dates and times with user-defined business logic.
- q **TDBFinancialX** performs complicated tax calculations.
- q **TDBHolidayX** manages holidays and can be used with the TDBCcalendar control.
- q **TDBTZoneX** calculates time differences between time zones for international time awareness and more.

New and Enhanced Pro 6.0 Features

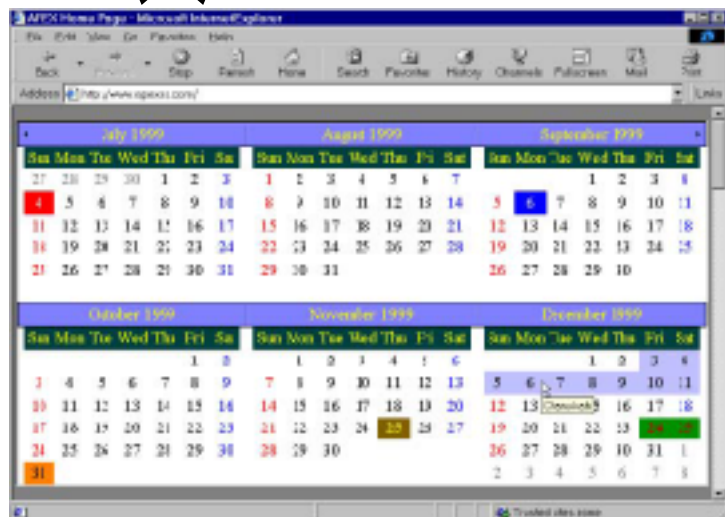

- q **Full support for Internet Explorer** and other ActiveX-compatible browsers.
- q **Character filtering** ensures only valid characters are entered by the end user.
- q **New interface** for dropdown calendar, calculator and text editing window.
- q **International character and format support.**
- q **Full integration with True DBGrid Pro 6.0** via the ExternalEditor property of the grid's column object.
- q **OLE drag and drop.**
- q **Smooth input and navigation** provides superior data input, selection, and key navigation styles.
- q **Spin buttons** to quickly increment and decrement values.
- q **Vertical alignment** of text.
- q **Caption settings** tailor both background colors and 3D text effects.
- q **Insert/overwrite mode** for editing.
- q **Masking of passwords.**
- q **Migration utility** automatically converts True DBInput 5.0 projects to 6.0.

True DBInput™ Pro 6.0

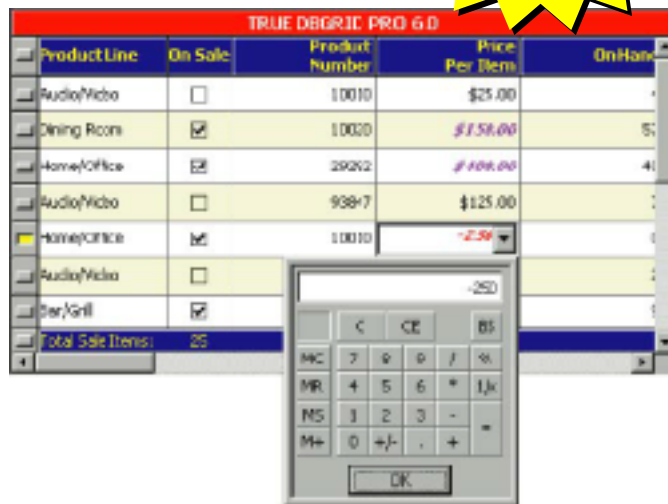

Data-aware ActiveX Input
Controls for Visual Studio

Full Support for
Internet Based
Applications!

Seamless
Integration
with True DBGrid
Pro 6.0!

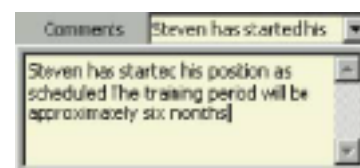

TDBCCalendar - New Full Function Calendar Control

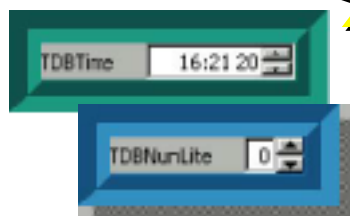

TDBNumber with Dropdown Calculator

Enhanced
Controls and
Dropdowns!

TDBText with Dropdown Text Box

Full Control of 3D Container Appearance

New
Spin
Buttons!

TDBDate with Dropdown Calendar

Flexible Masked Edit Control

TDBMask with password masking

True DBInput Pro 6.0 Advantages

- q **Compatibility with Visual Studio:** True DBInput Pro 6.0 can be used within VB 5.0 or 6.0 and VS 5.0 and 6.0 environments with full support for ActiveX Data Objects (ADO) 2.0, Data Access Objects (DAO), and Remote Data Objects (RDO).
- q **Flexibility:** Eight ActiveX Controls, five ActiveX Objects, and hundreds of properties provide the flexibility to create robust professional quality applications tailored to meet individual customer requirements.
- q **Integration with True DBGrid Pro 6.0:** A new interface is provided that permits True DBInput Pro 6.0 controls to be linked directly into a cell within True DBGrid Pro 6.0.
- q **Easy-to-Use:** Visual editing features in a WYSIWYG environment provide instant feedback at design time and reduce coding requirements.
- q **Superior Documentation:** True DBInput Pro 6.0 includes a thorough and well organized 450-page manual, extensive online help, 19 tutorials, and 4 sample projects.
- q **Responsive Technical Support:** True DBInput Pro 6.0 is supported by a dedicated team of knowledgeable personnel, peer-to-peer newsgroups, and a well maintained web site with online product updates, sample code, and answers to frequently asked questions.
- q **Free Run-time Distribution:** Allows applications developed with True DBInput Pro 6.0 to be distributed with no run-time royalty fees.
